| 9. Cluster Repair | 19. Fuse | |
| 10. Central Locking installation | 20. Injectors | |

TIPS TO MAINTAIN YOUR CAR FOR A SMOOTH AND COMFORTABLE DRIVE

Properly maintaining your car is key to keeping it in top condition. It can also help ensure your safety, the safety of your passengers and your fellow drivers. Here are some ways to help keep your car running smoothly.

INSPECT AND MAINTAIN TYRES

Inspect and Maintain Tyres:

Regular inspection and maintenance of your tyres will help prolong their lifespan and give you a good gas mileage. Car Technical Leader yearly maintenance plan includes features like checking tyre pressure, the PSI, tread depth and inflating and deflating your tyres accordingly.

PERIODIC OIL CHANGE

When the engine starts oil flows inside it to carry dust and debris with it into the oil filter. Synthetic oil change helps to keep the engine getting rid of the dirt and debris—thus damage. With the Car Technical Leader Annual Maintenance plan, we do the periodic oil change once in a year.

CHECK THE FLUIDS

The six fluids to be checked for the vehicle function and longevity are Engine oil, Coolant (Antifreeze), Power steering fluid, Brake fluid, Transmission fluid (in an automatic transmission vehicle, not a manual), and windshield washer fluid. With the Car Technical Leader annual plan, we do the periodic maintenance to enhance the life of the engine.

TEST THE LIGHTS

A broken or burnt-out bulb is a safety hazard and might get you a ticket. If a bulb is out, you can book a service from the App so that our expert Car Technical Leader mechanics will do the check and determine whether it's the bulb or the fuse that needs replacing.

REPLACE WINDSHIELD WIPERS

If your wipers aren't working like they used to, don't let the problem linger. Damaged or worn out blades can reduce visibility during a heavy rain or a snowstorm. With the Car Technical Leader annual Maintenance plan, the windshield wipers will be checked and if required will be changed by our expert Car Technical Leader mechanics.

HAVE YOUR BRAKES CHECKED

Your car's brake pads also require regular inspection. While driving, listen for any brake noise and pay attention to shuddering or vibrating from the brake pedal. With the Car Technical Leader Annual Maintenance plan, brakes are checked and cleaned. Even after that any concerns arise, please book additional service from our Car Technical Leader customer App. Our expert mechanics will look into the issue and resolve it at the authorised showrooms.

WASH YOUR CAR

Your car is subjected to all sorts of elements from the road. Some of those elements are hazardous and are not only unsightly but can cause damage to paint and the undercarriage. Please book a car wash from Car Technical Leader customer App to keep your car clean and sanitised.

CHECK BELTS AND HOSES

Keeping your car's belts and hoses in a good shape can help keep your car running and may help you avoid a breakdown on the road. With the Car Technical Leader Annual maintenance plan, car's belts and hoses are checked and any maintenance if required will be done at authorised showrooms. Also you can book a car health check-up from the Car Technical Leader customer App.
